EDUCATION

FRONTEND DEVELOPMENT COURSE, MATE ACADEMY (2018)

MBA, WISCONSIN INTERNATIONAL UNIVERSITY, UKRAINE (2014)

LANGUAGES

- English (Fluent)
- Ukrainian (Fluent)
- German (Intermediate)

CAREER ASPIRATIONS

Seeking a frontend development role with a focus on Vue.js or React.js, where I can leverage my extensive Vue.js expertise and my knowledge of React.js. I am also interested in fullstack positions that utilize Node.js. Passionate about joining a forward-thinking company that values innovation, continuous professional growth, and maintains a supportive and inclusive culture.

PROFESSIONAL EXPERIENCE

Professional Frontend Software Engineer, Mimacom AG, Stuttgart, Germany (Nov 2022 - Present)
Part of the Global Elements team at Mercedes-Benz.io, focusing on developing sophisticated web components for global headers and footnotes, ensuring a consistent user experience for an international audience across public websites.

Responsibilities:

- **Component Development and Maintenance:** Regularly develop and update features, focusing on performance enhancements and user experience improvements.

- **CI/CD Processes:** Actively refine CI/CD processes using GitHub Actions to streamline code deployment and integration.
- **SAFe Collaboration:** Participate in SAFe events like Daily Stand-Ups, Iteration Planning, and Retrospectives, focusing on component improvements, functionality enhancement, and future development planning.
- **Performance and Accessibility:** Focus on optimizing components for speed and accessibility, adhering to web standards to enhance the overall user experience.
- **Testing and Quality Assurance:** Maintain a suite of unit tests using Jest and Vue Test Utils, ensuring the reliability and stability of our solutions while minimizing bugs.
- **Documentation and Knowledge Sharing:** Produce detailed documentation and lead knowledge-sharing sessions to improve team proficiency and component integration.

Technologies: Vue.js, Stencil.js, GitHub Actions, TypeScript, SCSS

Frontend Developer, Valtech (Jul 2021 - Sep 2022)
I worked as a frontend developer at Valtech, enhancing digital interactions and functionalities, primarily using Vue.js technologies for various high-profile clients across different sectors.

Responsibilities:

- **Feature Development and Maintenance:** Developed and maintained front-end features that ensured high performance and user satisfaction.

  - **Hermès:** Participated in a major website redesign, enhancing product pages to align with the brand's luxury standards.
  - **Coloplast:** Implemented user-friendly features for checkout and enrollment processes, enhancing accessibility and interaction.
  - **Axpo Holding AG:** Supported corporate website redesign, focusing on improved CSS styles and layouts for enhanced visual appeal.
  - **The Hartmann Group:** Created responsive HTML email templates using MJML to ensure cross-client compatibility and maintain design integrity.

Technologien Vue.js, JavaScript, HTML, CSS(Sass), MJML, Jest

Frontend Developer, Giftcards Group, Netherlands (Apr 2019 - Jun 2021)
Based in the Kyiv office, served as a junior frontend developer, focusing on creating responsive landing pages for industry-specific gift cards.

Responsibilities:

- **Landing Page Development and Optimization:** Developed and maintained Drupal-based landing pages for optimal performance and functionality on key projects like Giftcards.nl, Cadeaubon.nl, and Cadeaukaart.nl.

Technologien: Drupal, JavaScript, HTML, Sass
